Oral Care Swab Stick

Hakuzo Mouth Clean A

▶ Outline

Aspiration pneumonia is one of the common health problems among elderlies. It is important to reduce the number of oral bacteria for pneumonia prevention. Oral care is one of the effective ways to prevent aspiration and decrease the number of oral bacteria. To help elderlies who are not able to brush their own teeth and improve their quality of life, we developed Mouth Clean A, the oral care swab stick.

Hakuzo Medical Corporation
