## ▶ Product/Service Category

Friendly to nature, the environment, and humans

Safe and secure plastic snaps

## ▶ Outline

Our plastic snaps are safe and secure products that are nature-, eco-, and user-friendly. These snaps are used in more than 50% of baby wear manufactured in Japan, and are also used by many other business fields. These easy-to-attach-and-detach plastic snaps have heat resistance for temperatures up to 210 degrees Celsius, and look as stylish as threaded buttons. We hope that these snaps will be used on clothing not only for care providers but also for care receivers so that their safety is further secured at care sites, where safety is considered to be top priority.
