## ► Product/Service Category

Oral care brushes“360do BRUSH φ”

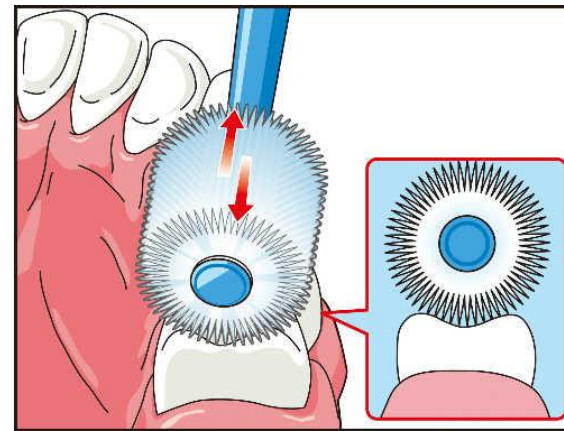

## ► Outline

- For elderly people to keep enjoying an active life, nothing is more important than preventing deterioration in their physical and mental conditions.
- Mouth care will help maintain good oral hygiene, enabling you to eat with your own teeth and feel the pleasure of eating.
- Good mastication increases blood flow to the brain and stimulates brain neurons, helping to prevent dementia. Practicing mouth care can thus bring greater effects on the elderly than imagined.
- Oral care is the first step for the elderly to avoid becoming a care receiver and to enjoy food pleasantly and safely.
- Oral care products vary in type, and using different products for different purposes is troublesome.
