Packing System for Smell Generating Waste Material

Odor elimination and infection control:
CareFor

► Outline

CareFort is a product to seal up a pack of wastes, such as used diapers, by using special adhesive tape. Odor coming from diapers when changing or storing them, and germs and viruses that have the risk of secondary infection will be instantly sealed up by special adhesive tape we have developed. This product will help prevent odors as well as germs and viruses from spreading, thereby contributing to the improvement of the sanitary environment of nursing sites and workplaces

Sumiron Co., Ltd.

► Features

The special adhesive tape does not allow odors, germs, and viruses to leak out. CareFort can instantly seal up used diapers, soiled items, such as blood- or fluid-stained gauzes, and paper that has wiped off vomited materials. CareFort will thus reduce the possibility of touching infectious sources, helping to avoid a secondary infection.

Insert wastes, such as diapers or gauzes, into CareFort and then just press the switch button. These wastes will be sealed up instantly. It can be easily operated by anyone.

As it is battery-powered and portable, CareFort can be used at the bedside or anywhere you like. Vomited materials can be disposed of on the spot.

Sumiron Co., Ltd.

► Company Profile

We specialize in manufacturing and sales of protective films for metal and building materials, automobile protective films, films for electronics devices, cleaning tapes, adhesive tapes for other functional materials, and products related to nursing care.
