

The Second Half DSANJ Bio Conference FY2025

Applications accepted until Nov. 20, 2025

- Purpose of this project:** Promoting collaboration on drug discovery, including joint research, technology transfer, fundraising for a startup, etc.
- One-on-one meetings:** 10:00–18:00 on Jan. 28, 29, 30; Feb. 2, 3, 2026
(choose your own meeting dates and times within this period)
- Location:** Online (Zoom meetings©)
- Organizers:** Osaka Chamber of Commerce and Industry (OCCI), Japan Agency for Medical Research and Development (AMED), Japan Pharmaceutical Manufacturers Association (JPMA), Kansai Pharmaceutical Industries Association
- Co-organizer:** Osaka Prefecture
- Support:** Japan External Trade Organization (JETRO), Osaka City
- Participants:** 100--150 researchers from universities, research institutions, startups, etc. / 30--40 pharmaceutical companies and 5--10 venture capital

The best way for startups and academia researchers who would like to approach Japan-based pharmaceutical companies

You can certainly have your proposal materials evaluated by Japan-based pharmaceutical companies (Approx. 30-40), and interested companies will request business meetings with you. DSANJ Admin Office will arrange a schedule for the meetings. You can propose your research directly to pharmaceutical companies' seed discovery and R&D teams through online meetings.

How to Apply

Apply through the online application page at
<https://www.osaka.cci.or.jp/dsanj/en/researchers/20251006.html>

Details

Applications accepted until Nov. 20, 2025

We're looking for research focused on...

Categories

Drug targets; drug seeds (substances); platform technologies for drug discovery; biomarkers; diagnostic drugs and technologies; digital therapeutics; medical devices for use combination with drugs, etc. (i.e., excluding devices designed for use on their own)

Modalities

Low-molecular drugs, antibody drugs, oligonucleotide therapeutics, gene therapy, recombinant protein, cell therapy, AI-powered drug discovery, vaccines, viruses, regenerative medicine, SaMD (treatment apps), digital healthcare, protein-protein interaction inhibitors, etc.

Target Disorders

Metabolic disorders, circulatory disorders, infectious disorders, respiratory disorders, musculoskeletal disorders, cancer and malignant neoplasms, central nervous system diseases, pain, sensory organ disorders, immune system and inflammatory disorders, allergies, skin disorders, digestive and urinary disorders, ob-gyn disorders, rare disorders, etc.

Stage of Research Progress

Basic research; non-clinical POC pending; non-clinical POC obtained, clinical trials pending; clinical trials underway, etc.

Why you should apply for DSANJ Bio Conference

Support to help you forge partnerships with companies

DSANJ Admin Office coordinates one-on-one meetings between you and personnel involved in research and development.

Opportunities to see and interact with private-sector drug discovery research

One-on-one meetings with companies are an excellent chance to learn about the latest thinking in private-sector R&D. Past participants say that information and views heard from corporate researchers are useful for guiding their own basic research.

Schedule

Application Period

Aug. 20 ~ Nov. 20, 2025

Participating companies read your proposal materials and consider the request for one-on-one meeting
(We will contact you by **December 26, 2025** to let you know how many companies request the meeting)

Participation in The Second Half DSANJ Bio Conference FY2025

One-on-one online meetings
with companies:

Jan. 28, 29, 30; Feb. 2, 3, 2026

Even if the meeting dose not go through, your proposal materials and contact information is shared with participating companies.

DSANJ Admin Office notify you of meeting results and feedback
approx. 1 month after the conference

How to Apply
